

# Help Wanted – Workover Lead / Assistant Production Foreman

We're looking for a **hands-on oilfield leader** to help run our production and workover operations in the Appalachian Basin (southeast Kentucky, Tennessee and Virginia).

This job is **in the field every day**, not behind a desk. You'll be working side by side with crews, leading workover rigs, fixing problem wells, and keeping production running safely, cost effectively and efficiently.

## What You'll Do

- Lead **workover rigs** on well cleanouts, repairs, and downhole jobs.
- Supervise tenders and internal equipment, keeping jobs safe and on track.
- Troubleshoot wells, pumps, and production equipment.
- Back up the Production Foreman and step in when needed.
- Handle daily field reporting and make sure work gets done right.

## What We're Looking For

- 7-10+ years in oilfield production and workover rigs experience.
- Experience running or leading a crew.
- Strong mechanical know-how and problem-solving skills.
- Willing to work outside daily and answer callouts.
- Safety-minded and dependable.

## What We Offer

- Competitive pay with bonus opportunities based on individual performance.
- Company truck and fuel card.
- Benefits (health, dental, vision, 401k).
- A stable company with room to move up.
